

Toufic Hanna

FULL-STACK DEVELOPER · JAVA / SPRING & REACT

toufichanna00@gmail.com · (+43) 0676 5508715 · Hall in Tirol, Austria
toufichanna.dev · github.com/tof-98 · linkedin.com/in/toufic-hanna

- Owned a Windows→web migration
- MFA & SAML SSO across the platform
- SQL performance: timeout eliminated

Summary

Full-stack developer with around 3 years of experience building secure, scalable web applications. Focused on **Java/Spring backends** and **React frontends**, with particular strength in authentication, API design and database performance. Authorized to work in Austria; continuously employed since January 2024. Eligible to switch to the Red-White-Red Card plus (unrestricted labour market access).

Professional Experience

Full-Stack Developer

January 2024 – present

LITTERA Software & Consulting GmbH · Hall in Tirol, Austria

Multi-tenant library management software for libraries and institutions

- **Independently owned** the migration of a Windows desktop application to a web application: spec broken into work packages, tickets estimated and delivered.
- Diagnosed a timeout on **200+ items** as over-fetching and eliminated it **entirely** with an optimized SQL query.
- Rolled out **MFA (TOTP)** with Spring Security platform-wide and built **SAML-based single sign-on** with external partners.
- Built a book rating system with configurable anonymous-rating prevention – positive feedback from **multiple client libraries**.
- Built a bulk close for lending sessions in React incl. per-institution receipt logic, cutting manual end-of-day work.
Also: Batch cataloguing across multiple ISBN-13s, procurement module with Excel import and supplier API, Solr autocomplete, RFID SDK migration, production support through log and issue analysis; mentoring a junior intern through onboarding and code reviews.

Software Developer

2023

Collaborative Project · Syria

- Implemented a full Gantt chart module using dhtmlxGantt (pure PHP, no framework), delivered in **six months**.

Core Skills

BACKEND

Java Spring Spring Boot Spring Security JPA/Hibernate REST APIs JUnit

FRONTEND

React TypeScript JavaScript HTML/CSS Tailwind CSS

DATA & INFRASTRUCTURE

PostgreSQL SQL Solr Docker Linux Git GitHub Actions Nginx Multi-Factor Authentication (TOTP)
SAML / Single Sign-On JWT

Also: PHP, Symfony, Node.js, jQuery, Drupal, MariaDB, Maven, Bash, Oracle Cloud, AI-assisted development, agile development.

Personal Projects

Self-Hosted Vaultwarden · Docker · Oracle Cloud · Linux – Runs a Bitwarden-compatible password manager on self-managed cloud infrastructure; configured reverse proxy, SSL and persistent storage.

Portfolio Website – toufichanna.dev · Astro · Docker · Oracle Cloud – Designed and built a personal portfolio site; handled deployment and server configuration independently.

Education

B.Sc. Software Engineering & Information Systems
Tishreen University · Syria · 2016 – 2022

LANGUAGES

Arabic Native · German C1 · English B2

Certifications

- Google AI Professional Certificate – Coursera, June 2026
- AI Fundamentals & Compliance – Mindlane, February 2026
- Google Cybersecurity Professional Certificate – Coursera, December 2025
- Object Oriented Java: Data Structures and Beyond – Coursera, November 2023
